Pre-Operative & Post-Operative Visualization

View 3D models in pre-surgical and post-surgical conditions to assess anatomical models before and after surgery, ensuring optimal outcomes and enhanced decision-making.

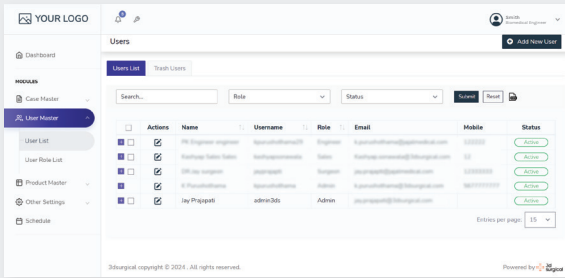

Data Security

HIPAA/GDPR-compliant data security ensures patient privacy while maintaining seamless access to critical information.

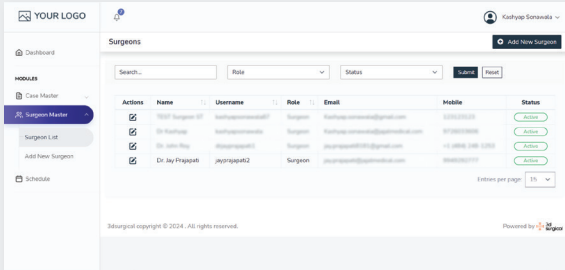

Interactive Surgical Planning

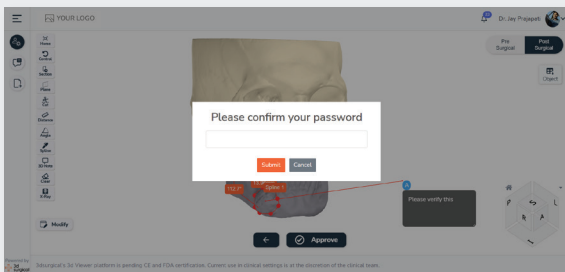

Experience real-time, collaborative surgical planning with high-resolution 3D visualization. Streamline communication between surgeons and engineers, ensuring precision with every case.

Role Based Access

Empower your team with tailored permissions for surgeons, engineers, and administrators, ensuring the right people have access to the right tools at the right time.

Rapid Development

Set up quickly with minimal disruption to your workflow. The platform integrates easily with existing systems, allowing you to focus on what matters - improving patient care.

Integrated Quality Management Checklists

Automate quality control with built-in checklists that align with regulatory standards, reducing the risk of errors and ensuring compliance at every step.
